

Why did Estelle come back to give Lessons to the Earth Plane

By Estelle Roberts 2012

You asked why I wanted to return and visit, to be around you. It is not something which can easily be explained because to understand the reasoning you would have had to, as I have done, visited many of the groups and circles which I have done over the years since I left the Earth Plane and then you would get a true understanding of how unique in so many ways the group that you have got together is.

I haven't actually been back to the Earth Plane for a number of your years and I haven't missed it I tell you. You might think that's a nasty thing to say but I haven't, because as you move forward the significance of the Earth Plane, and I mean this in the kindest way, really becomes unimportant. You place it in the essence of what it should be. It is a small schooling apartment, a place for learning, and if you do not wish to be a teacher in that school why do you wish to keep coming back and enquiring about it? Surely you're better to utilise your abilities, whatever they might be, to the people who you can help and I've been working on the people in the Summerland, in the highest spheres of the Summerland and because I've been teaching the people or delivering the little bit of knowledge I have to those spheres I have been greatly removed from the Earth Plane.

I realise now that maybe I've been missing out a little bit, which was why I was quite happy to come back and be part of your group. Our group is growing in the astral sphere. Each time people come to visit you they want to hang around don't they? It does say something – either says something about you or something about the people on this side who are delivering the message and grouping together the people. They must be doing the right thing mustn't they if it keeps growing because if it wasn't people would come and speak to you once and then want to go away. I mean why go somewhere if you're not getting any pleasure or benefit out of it, and I don't mean that in a negative way.

You know that time is not measured in the same way as it is on the Earth Plane. It is still precious and therefore you want to spend the periods that you have in the best position, in the best place where you can either absorb or give out the teachings and if we want to absorb the teachings with all due respect do you think we would come to the Earth Plane. Why on earth would we come to the Earth Plane for teachings? We would obviously go to higher spheres and this is something that the peoples of the Earth Plane find very difficult to comprehend. They think that the Earth Plane is the be all and end all of the Universe. What a silly idea! It's a little blue planet, hardly even a grain of sand in the Sahara Desert and there's an awful lot of sand in the Sahara Desert believe me, but if you look at the size of the Earth Plane within the concept of your galaxy, even your sun in the concept of your galaxy, it's very insignificant isn't it? And you don't think with all those suns and all those planets that surround the galaxy, that your little sphere is the only little sphere which is utilised? Now that's an extremely egotistical thought.

We mustn't get intolerant and we all do don't we? As we get our knowledge improving we get very intolerant with those who do not see things as clearly as we do. We think how can they profess to be who they are or who they profess to be with their lack of knowledge, that lack of ability to show love, that lack of compassion, that surface facade which so many people give out and then you ask why did I find it comfortable and want to come back? Can you just imagine having visited all these groups and been totally disenchanted to then finally come amongst the group in which not one of the negative traits exists and you ask why I came to see you. In reality it shows the true humility which exists amongst you because you do not feel important. You do not feel that your work is important at this point in time. If you could only see it from our side. How your group has been used to enlighten so many people in the Summerland. They come in their droves and you think that you are not doing good?

It's a strange thing you know because Maurice was and is so much an important part of our group and yet he never spoke of it when we met. Probably because we both had our own work to do over here and therefore we very rarely came into contact.
