

Our Guides have Humour and can be Wrong Sometimes

By Estelle Roberts 2012

They think just because we have left the physical that we are totally devoid of any humour. What a boring old life! Just imagine just all sitting around with long faces saying we've got to go and listen to the talks and we have to keep all serious! What a dreadful night! What a dreadful perception, but people do that do they not? When they go to churches they don't go there happy and smiling, they go all serious. They're meant to be there to lift their spirits. How can you lift your spirits when you're all being serious?

I suppose they think it's disrespectful.

It is disrespectful not to be happy. That is what is disrespectful but I'm speaking little bit out-of-school aren't I because I shouldn't denigrate the way people behave. Maybe I haven't purified my being as much as I should but I'm sure you will forgive me.

Young Maurice was very disappointed about the church which he thought would be a good place to start to do his current work with our medium, because he picked it out you know. He was looking around and saw the church and saw that his guide's teachings were being utilised and said that would be a good place to start because they have already got the grounding. Wow was he wrong! It just shows you that we have the facility to be wrong and that is something else that people just don't fully perceive and understand, that we are only people and we have the ability to be wrong. It would be pretty boring really wouldn't it if we were always right, but that's what people consider. I understand at the church there was a young lady who used to keep notes just so as she could criticise.

Yes unfortunately.

I mean how, how wrong can that be, because if you are always looking for faults you will always find them. You will always find differences in the interpretation when messages are given clairvoyantly. After all we are still utilising the mental capacity of the medium who is being utilised and I use the word medium loosely, because medium can be interpreted as anybody who can communicate with spirit, which is a stupid statement because each and every one of you can.

I don't say each and every one of you do, but I do say each and every one of you can, so that means each and every one of you are a medium. So therefore it reduces or minimises the importance of the medium and we can't have that can we?

We can't have everybody doing it. We can't have everybody being able to speak to their spirit friends. Ooh wouldn't that be bad and we have to keep control, we have to keep the mysteries there. We have to make people think that we're special.

Let's hope in time it will change.

It won't. It will improve but it will never change truly in the way that you are hoping because for it to reach that point of change the peoples of the Earth Plane would no longer need to visit the Earth Plane and therefore the change would happen in the spheres of the Summerland. So long as the Earth Plane exists you will always have this degree of negativity shall we say, but don't be upset about it because you are spirit, you are not a part of the Earth Plane

Some of your friends, spirit side, are getting quite jealous because I've actually got you talking. They said how did you do it? I said you've just got to humanise, got to be happy, got to smile, got to bring a little bit of levity in. They feel that their lessons are so important and so serious that they get caught up in it. I don't have any lessons to give so I don't have to get caught up in it. I can just come and have a chat. It is a sublime method of teaching because if it is taught in that manner you are giving the lessons and people don't even realise it. Isn't that clever? Yes we're giving you lessons and you don't even know we are.
