

## Some Differences between the Earth Plane and the Spirit World

*By Estelle Roberts 2012*

Did you know that when I was on the Earth Plane I had three husbands?

*Yes I read that in your book. At the time a lady's place was at home in the kitchen with an apron on cooking.*

Exactly. I never was very good at cooking though. Some people are just born to do it aren't they? You wouldn't want to have any of my cooking. Don't have to do that anymore you know. Yes it's a funny thing when you come over here. You think of all the things that are important to you when you were on the Earth Plane and initially it's very difficult to lose their importance. Even little things like having your evening supper and having a quick drink, and I'm not talking alcohol just a cup of coffee, a cup of tea. I didn't do the "royal" thing you know with the little finger up. I held a cup properly. We thought it was very dainty doing that. I wasn't very dainty though, so I didn't do that. Did you do that?

*No.*

I thought you might because you came from England didn't you?

*Yes I did.*

You're the only one really, English that is, aren't you? Fellow countrymen and all that.

*Yes we all come from different countries.*

Yes all the rest are foreign, well not English.

Very silly all these labels that they put on people isn't it? What does it do? It creates a separation and that's all wrong isn't it?

Yes and what's the point? We're all people. When I come back to talk to you I come back as I left, as a lady or a person of the feminine gender, but when I'm over here, when I'm doing my teachings, because I told you before didn't I that I teach in the Summerland.

*Yes you did.*

Yes well when I'm teaching I'm not a lady, I'm not a man. I'm just a person and that's very difficult for people on the Earth Plane to comprehend. You know that you're just people. How can you not be male or female? How can you just be people? But that's what we are. We're only people because the necessity for genders is something which is a peculiarity of the Earth Plane and obviously the annexure to the Earth Plane, which is the Summerland, or to be more correct the Earth Plane is an annexure to the Summerland. But we don't want to call it pedantics do we and it's important at that time for the reproduction process. It's strange you know, in the lower levels of the Summerland you get reproduction exactly the same way you get it on the Earth Plane you know.

*Why is that so?*

How do you think it so? Do you think your physical body is so unique? In the lower levels of the Summerland all the bodily functions and activities are exactly the same as it is on the Earth Plane. You could almost say it's a mirror image of the Earth Plane, or more correctly the Earth Plane is a mirror image of it. They do all the things that you do on the Earth Plane and it's no different and it's set up purely because some people cannot adjust to the transition from the one sphere to the other. So when they pass over from the lower vibration of the Summerland then they generally come back to the Earth Plane. They just go from one life vibration to another.

*What happens with the newborns?*

Well they don't get newborns. Where's your teaching girl? You don't have a new being but an existing being gets a new vessel. The children are created in the same way as the children on the Earth Plane are created. How can you have the total similarity unless you have all the same bodily functions. When I say it's the same it **is** the same, identical. Are you with me now? And therefore you can't have something that's identical if it's different. Yes? Because they even copulate in the lower vibrations of the Summerland, and what's the point of doing that if you're not going to have children?

So therefore the perception that children are created, and that sometimes they are created by beings who are from higher planes, is incorrect. The one big difference between that part of the Summerland and your current Earth Plane is that it is possible, if an understanding is obtained in these levels, that the people can be removed and not return to the Earth Plane but removed and moved into the higher levels, shall we say of the Summerland and therefore they still die in the perception of the people who are in the lower vibration of the Summerland but they are not returned to the Earth Plane. They are returned to, or they get moved into a place in the Summerland where they can be taught. There's an awful lot of people in the Summerland you know.

*Is it crowded?*

That's a very silly statement isn't it? We have the universe. You are trying to conceptualise it within the confines of the Earth Plane aren't you? Well you think the Earth Plane is this little ball, this little speck of sand in the Sahara. Now the Summerland extends the entire surface of the Sahara. That will give you a little bit of the concept of space. So therefore if you have that amount of space do you think it can be crowded?

Because the Summerland is a place which is generated by thought and that concept is very very difficult to comprehend when you're in the physical isn't it? To think that you can manifest things in your mind and they become a reality, but that is a statement of fact within the confines of the Summerland.

It's the same thing with transportation. It's all very silly when the peoples of the Earth Plane think that we would have to come down in spaceships. I mean how primitive can you get. Why would we require spaceships when we can move from say Australia to London in a blinking of an eye. So if you can move distances that quickly why on earth would we want a machine to do it as well. It is just inconceivable to us that people of the Earth Plane can misunderstand the realities, but why is that? The simple answer is because they are confined within the physical body and therefore they cannot perceive anything which can exist outside the parameters and the laws of the physical body.

*In spite of the knowledge they receive?*

But the people who have this perception don't have the knowledge. All your brainy scientists etc keep trying to disprove the existence of what is affectionately called the spirit world. I mean after all we're all ghosts over here aren't we? Yes we go round with big white cloaks on us. Oh yes I'll come down and haunt you. What total nonsense.

*Well if they believed that means they would have to accept the fact that it's not them, all the knowledge that they have it's not coming from them.*

No they'd have to accept the fact that there is a greater knowledge and that would be dreadful wouldn't it. Just imagine accepting the fact that somebody has more knowledge than you. But that's the problem isn't it? That we can't conceive that there could be a level of understanding and yet it doesn't matter what religion you follow, they all believe or conceive that there is a heaven, or a Valhalla, or whatever and yet they don't take the next step.
