## **We all have Issues to Deal With**

*By Estelle Roberts 2012*

At the moment our medium has a few issues and we have a few issues with him, and we all have issues of one sort or another don't we?

*It makes the world go round.*

Yes but that's life isn't it. You have to have these little aggravations shall we say. Sometimes they're not so little though are they? He's getting very despondent at the moment you see. Wondering how he's going to get out of his current situation. Why should your problems go away? You heard what our last guide said didn't you? You're on the Earth Plane to suffer and you do it so well sometimes. Well you do don't you?

*I leave that all to Roy.*

Well you don't really. Don't tell me that you don't have problems dear girl.

I have a problem at the moment because the physical body I am occupying at the moment has pains in his back. This I am told is not my problem to sort out so why shouldn't our healing guides sort it out. We do have our issues sometimes even when we come and we think that we are doing the right thing. Then we say well you've got to go and occupy that physical body and you're not allowed to do it in light trance anymore because he doesn't want to do it that way. You have to go and do it in deep trance and then you go and do what you are asked and then you suffer all the physical problems that he has, you see. So don't think that you're unique with your suffering!

I did enjoyed that little rant. I don't get to rant very often you know. Well it's very different in my normal work in the Summerland because I'm dealing with people who are reasonably well, I don't like the saying, but they are reasonably well evolved. I mean they are fairly high up there as far as the spirituality, the love content of their being is concerned and they are the people that I deal with on a day-to-day basis.

Well that's a silly statement anyway isn't it because we don't have days? We just have time. Well we don't have time even, we just have periods. And we don't have days. You know why we don't have days?

*Why don't you have days as we know it on earth?*

We have no sun. The day is only due to the revolution of the earth and if we don't have an Earth Plane to stand on, how can we have a sun? We also don't have a moon. Well we could have a moon if we wanted to. We could and can have anything we want if we really want to but I'm being silly now but because we have light and with this light you get an illumination, an illumination of your being, an illumination of the sphere shall we say, that we survive in, live in. I can't really call it survive because compared to the Earth Plane it's not survival is it? Well compared to the Earth Plane even the lower levels of the Summerland are heaven aren't they? And when you get to the more elevated areas, well then it's totally different again because all the people that are surrounding you are reasonably loving. They still have their little tiffs but it's in a different way, but that will be a subject for a future talk.
