Our Guides do not Have All the Answers

By Estelle Roberts 2013

It's a strange thing you know people often wonder how we arrange things and we can at times foresee that an arrangement has to be made and when we do that then we can preempt the problem and have the answer quickly at hand, but when we do not expect the problem it takes a little bit longer to gather the troops together, so to speak.

I have missed our little chats you know because you have given me in the past a question which I required to look into and I've had to do my own thinking. I haven't minded. It's just that when you have had a situation, that is when somebody is requiring assistance, then you can utilise that person for the benefit of all those around. So never be afraid to question and to ask.

You should never ever feel silly, as you so quaintly put it, about something which is disturbing or something which you are not fully attuned to because that is the only way we learn isn't it? Because if we all had the capacity of knowledge, the full capacity of knowledge, there would be absolutely no need for anybody to come and give you lessons would there? Because you would already have facilitated all the answers, and quite often we don't realise what people are confused about because obviously we are fully attuned to a higher sphere and therefore we have a higher level of knowledge and understanding and when you get to that level of understanding it's very difficult to comprehend why other people don't see it as clear. And we all have that problem and if you take it back to our schooling example, when you are in the lower grades you need a great deal of tuition to get up to the higher grades and when you are in the higher grades you cannot perceive how anybody can't see things as clearly as you do at that level.

And the scenario, the situation, is very similar to ourselves and the only way we actually find out about what the problem is and why you have a query is by having your guide, your mentor, your friend, to converse with us and therefore with that knowledge we can then go forward, investigate and come up with a talk which is destined to hopefully answer that problem. Sometimes we do it and the individual doesn't realise what has really occurred but how often at our meetings has the statement come "I was wondering about

that” or “that is something that I never understood” or “that is something that I now have a clear understanding”. It doesn't happen by chance, it doesn't happen by fluke.

When you have an understanding it is a requirement to go back to the Halls of Learning and learn how to communicate your understanding to the people of the Earth Plane. That is something that the peoples of the Earth Plane have never considered you know. They think that when we come to the meeting, with our knowledge, we have the ability automatically to exchange that knowledge and that of course when you really analyse it, is illogical is it not? Because as you advance through the academic schooling you have the knowledge but that doesn't mean that you have the facility in your personage to transmit that knowledge to those who do not know. This is why your teachers require a level of training to have the ability to understand how to pass that knowledge on. We all have a level of knowledge don't we, but we don't all have the ability to transmit that knowledge, so why should we be any different? After all we are only people. We are people no different to you and equally you are no different to I – Maurice was very pleased with me there, I didn't use the word me. Well he does get picky sometimes doesn't he?

Yes he does like correct usage of the English language.
