We Can Purify Ourselves

By 2011 Maurice Barbanell

We can all be as pure as my mentor Silver Birch. All we've got to do is elevate our being to the same state. You can be as the Nazarene said "Today I go to my Father's house and each and every one of you are capable of joining me there". He didn't quite put it in those words and he didn't quite put it in that context but he has said that at various times. I'm not special.

In my Father's house there are many mansions.

Well that was a scenario of a similar vein but what he was always saying is that even though he might be going to his Father in Heaven each and every one of us have that capacity to be there with him. All we've got to do is to purify this being that we are, this aura, this greyness which is around us. Sounds so simple doesn't it? Put us in a washing machine and wash it all out. Have a bit of Persil yes.

Believe me if that was easy I would jump in.

Yes. Persil washes whiter doesn't it? Well that's what they said on the Earth Plane when I was on the Earth Plane. Persil washes whiter and then therefore if we jump into the washing machine with a bit of Persil we would come out cleansed would we not? If it would only be that simple, but it could have happened you know. The Great Master could have put his hand out and wiped it all out.

It wouldn't have done us any good.

Because the being and the thinking would have still been down in the dumps, would have still been in the gutter and therefore the essence of your being would be diminished and therefore nothing would have been achieved. We all have to do it ourselves. Doesn't seem fair does it? Just because we degenerated ourselves we have to get ourselves out. You'd think that we could have somebody do it for us couldn't you. We do that with so many things don't we. We farm it out. We delegate the task.

Delegate that's it, yes. I want to delegate the purification of my being please. Not going to happen. We have to do it ourselves.
