## **The Inaccuracies of The Bible**

*By 2012 Maurice Barbanell*

I want to talk to you a little about the book you call the Bible or Gospel.

You realise when you read the Christian Bible just how inaccurate the Gospels really are. They cannot be anything else because of the methodology which was used in their preparation shall we say. The basic facts and concept are still there but when you look at the finer details they do vary and it is a statement of fact that there is actually only two manuscripts or scrolls as they were on, which were actually original. All the rest were copies of copies of copies. When I said original I meant in their original form by the original writer and that is why you have such a lot of misinterpretation.

*Does somebody have the original scrolls?*

They have been destroyed over the years. After all if you realise just what they were originally written on, later they were done on parchment, but in the early stages they were done on basically reed material and it isn't the most durable. It's not a material that lasts a long time shall we say. It doesn't preserve itself well. It's not good for preservation reasons. The original are still underground shall we say. They are in a cave but if they are ever found or discovered they will not be brought to the public eye because it will create too much controversy. The basic message is still there, which was the idea of bringing the whole thing together because it is basically right. But don't look at it too closely because if you look at things too closely you can find holes in them and then as soon as you start doing that that's when problems occur. It is true with a lot of things in life you know. You start analysing things by the word and then you find fault because nothing is totally unquestionable. Anything can be questioned and if you want to find an error in it you can. Even with facts you can find errors and if you think about it the Gospels actually weren't written until 30 to 40 years after the event and how can you actually get a true 100% record 30 to 40 years later. Can any of you remember conversations you had 40 years ago? Of course you don't. It is merely the recollection of what has been said and therefore that's why we say the events are what you should take note of, not necessarily the actual words.

*Well if it doesn't sit well one should just simply put it aside.*

Yes. Well have you ever been told, I know as a group you've been told but I don't know if you were around at the time . . . . ., why the Jewish nation was utilised for what has become the Old Testament or the Torah in the Jewish terminology.

Well the Jewish nation were utilised because of their desire to record things and when you actually analyse the Old Testament it's basically a history book and therefore because it was a history book and because they had excellent scribes then they, the powers that be, decided that they would utilise this facility and that is what has occurred. They have utilised that facility so the words could be recorded and be utilised for the betterment of the area. I was going to say the betterment of mankind but that would be an exorbitant statement because really it was only the betterment of the area which was affected.

*Well it has really benefited mankind in a way.*

It was the start. It was the start of what was to occur in the future and it really was the start of the Christian faith because the Nazarene was a Jew and he never ever decried his Jewish faith. He didn't say you should cast off your Jewish regime, your Jewish faith, your Jewish thinking. What he said is this is what you have been told in your faith and he was talking about the faith of the Jewish religion, he said but what I'm telling you is the next step forward. I'm telling you how to live your life now because that was true when it was written.

Now there is a new enlightenment and that occurred within 2,000 years of it first coming into being. So therefore what we are doing now is really no different. We're saying that the teachings which were in the Old Testament, the Jewish teachings, were good for their time. The teachings of the Nazarene were good for their time, so therefore we will utilise the teachings of the Nazarene and then not improve but enlightened people in a more modern way because the basic teachings we can't improve and that's why we have a problem when we go out and they say you say we are doing the new teachings but what you're actually teaching is the old teaching.

What a load of garbage because how can you change the basic teaching? How can you change the fact that you need to love one another? How can you change the fact that you need to have faith? That you need to completely trust in the Lord? How can you change the fact that you shouldn't get angry? How can you change the fact that you should give love? I mean those are all basic parts of our teachings. It was a basic part of the teachings of the Nazarene. It's the basic part of the teachings of Silver Birch. It's the basic teachings of White Eagle. It is the basic teachings of the Prince Buddha. I could go on. It's all the basic teachings and yet they want something different. Why?

*It'll be difficult.*

Yes, but that is the problem that we face you know. We have to try and create this aura, this wow factor and there is no wow. There is no great enlightenment, new enlightenment. It's old enlightenment brought up to date and the big difference is in the old teachings you were man. The Earth Plane was the essence of your life. You could not think outside this and therefore all the teachings were about life on the Earth Plane. When you passed over you went to Heaven. You didn't actually go to Heaven because you were waiting for the Judgement Day and therefore you were in suspended animation weren't you. You were in no man's land. That is until Gabriel came down with his big horn, yes and he blew his horn and everybody rose up.

What a load of poppycock but that's what people believed and that's what some people still believe. Very strong religious people vehemently believe that, but then they say well after the resurrection what happens? You then get returned to Earth in a purer body. There's where the problem arises. Why on earth would you want to come back here? I was about to say why on earth would you want to come back to Earth, but I thought that was a bit of a double wasn't it, but it's true because people's perception was that nothing... they couldn't see past the physical so everything had to be brought back to what people knew. Now the enlightenment is improving. Now people can see outside the square so to speak and therefore to advise them that their life continues outside the physical and you go into what we have called the Summerland is a huge leap forward because you are not then going in to this state of nothingness. You have actually got something to look forward to – a continuation, not a continuation sometime in the distant future but a continuation right away and therefore that continuation has to be not too different to what you're used to now because that once again would be too big a step for the people of the Earth Plane to conceptualise. It would be far too big a leap so therefore it has been made as a gentle step. The Earth Plane is slowly raising its vibration and changing so it's becoming more and more familiar or associated with the Summerland, so that when you move forward there isn't that big wrench.

The Nazarene when he was on the Earth Plane really taught to a very small group. He didn't wander very far you know. He didn't actually wander outside the parameters of where he grew up so to speak, but that's not surprising. What was the mode of transport? Foot or donkey. You can't travel very far on foot or donkey can you?

It's a strange thing that it wasn't until after the Nazarene had passed away that his message truly spread and what are we? In a lot of ways we are only disciples, disciples of the Great Master to spread his word.
