Spiritual Teachings and Teachers / Masters

By Estelle Roberts 2015

The Wisdom of Estelle is special because it is mine because we all have our own wisdom don't we? We all have our own ability to know what's right and wrong and that is an inherent right you know. It's the reason why you know what is right and what is wrong is because each and every one of us has the spark of Divine Love.

So many of your friends from spirit side come and give talks and when they give talks you think that is really wonderful but unless you can communicate on a one to one basis it doesn't seem to sink in the same way does it? If we can talk as friends and I hope we are all friends aren't we, then the talk we are having hopefully will sink in a little better. I won't go round asking your names because I will jolly forget about them because each and every one of you have your spiritual name and that's what we really know you by.

You never thought about that did you? You thought my name is very important because that's what I'm known by, that's how people know me. Well I've got news for you. You've had 10 and sometimes 20 to 30 different names, so which jolly one should we use? The one you had this time, the one you had last time, the one you had 10 times before? They're all your names aren't they? But that's why each and every one of us have our spiritual name because that's the name which goes forward.

So when you live your life don't ever consider that all teachings that come from spirit or from a spiritual base are necessarily fact. Don't ever consider that anything that is uttered in a meeting such as this is 100% fact because the individual who is giving those messages or giving the talks is utilising the knowledge that they have for that point in time, for their point of development, and not all people who come to give talks are of a higher vibration and yet that's what people perceive isn't it? They perceive just because we've come from another sphere – and I won't say another world because it's not another world – you're all part of the Summerland. Did you know that? You're just a small section of the Summerland which is cut off from them. You could say you're all Catholics because you're all cut off you see and you're all special. *(Laughter)* Well you can can't you? You see I got a few titters there didn't I? Well they do, don't they? They think they're the only ones up here. Well they're going to heaven and nobody else is. So the rest of us are going to have a jolly good time aren't we?

So always listen to what is being said and if it doesn't feel right you just ignore it.

Something that people don't realise is that when we come and we choose to do the work we do, we try to do it in a way which is acceptable to the people we are speaking to and therefore I have to keep changing the way I speak. And so do all the people who come to communicate with the Earth Plane because it would be totally different if we came in William Shakespeare's time because the way that English was spoken in that era was so totally different to what you perceive now, and if you came and you talked in that way now, well they would think you were all a bit weird. Well they would. They would call up the man with the white jacket and they would strap you up. They would say he's a bit touched isn't he? *(Laughter)*

In years gone by they would come to meetings like this and they would all burn us at the stake! Well they would wouldn't they? I mean you're talking to the dead aren't you! Which is a lot of tripe because how can you talk to the dead? What is dead is something which you leave behind and that's your physical body. Your body's dead because you can't use it anymore and that's a reasonable definition of dead isn't it? Something which cannot be used anymore. It's useless. But the being which is you, the being which animates that physical body, that precedes and that goes forward, and lets you join all the loved ones which you left behind in the Summerland. All the loved ones you have had that precede you on the Earth Plane. They are all there waiting for you, waiting to welcome you back, welcome you back to the Summerland.

Now a lot of people have asked what happens to the individuals who obviously come down to the Earth Plane to teach, the Masters. People like the Nazarene. People like Prince Siddhartha. You know Prince Siddhartha, people call him the Buddha. Buddha wasn't his name, did you know that? Yes he was a prince of India and he had two wives you know. Did you know that? And he had quite a few children as well and he left them all behind. Well that wasn't nice was it? I mean he just deserted his family. He just walked out. We would call him a bit of a bounder now wouldn't we? Well we would wouldn't we, because he just left his family behind. Fortunately his father was rather well off so therefore he left them fairly well provided. But I utilise those two individuals because they are two which you are aware of.

There are many Masters who are actually walking the Earth Plane at the moment but they do it quietly in a small group because it has been decided that it is far better to have many Masters visit the Earth Plane and bring small groups forward rather than have something as wonderful as the first Buddha, Confucius, Mohammed, the Nazarene, enter the Earth Plane and form a new organisation. Because they all come from the same place you know. They all come from the same base of teaching. It's only the jolly people on the Earth Plane who mess around with their teachings and make them mean something which was never intended in the first place. But it's true isn't it? They take these teachings which in their essence were absolutely wonderful and they twist them. They put the odd word in. Sometimes they change the whole phrase which changes the whole context of what is being said. And why do you think they do that? They do that because it gives them "the hierarchy" – excuse the parenthesis – "the hierarchy" of the church. How wrong is that?

You even have it in Spiritualism don't you? You have people who think that they are better than others. Well if you think you're better than another person I would ask you to look at yourself because you are in no position to judge another individual. You are in no position to see what is developed within their aura and within their being. When you come to the Summerland then you can see other people's auras. Then you will be in a position to know how wonderful somebody is or how wonderful somebody isn't, but I went on a tangent again didn't I?
