People of the Astral Sphere Connecting with the Earth Plane

By Estelle Roberts 2018

I don't get the opportunity to sit back in this comfortable chair. So I'm going to take a different pose should we say, and it's strange the way people like to put up a front. We're all guilty of that at times aren't we? We put up a front because we consider that that's what or how people perceive us or how we would like them to perceive us. And why do we do that? We do that because of a feeling that we want to be accepted. But surely it would be better if the persona that we put forward is true and genuine and then if people truly have a liking towards us it would be because they have a liking to our true self wouldn't it? But we are all guilty of that from time to time aren't we? We put on a face so to speak. A face which we face or show the world.

But it's not our true self. It's not the way we look at life. It's not the way we look at the behaviour of those around. Now it is really good to hold your tongue when we are mixing with people. *(we had a grandfather clock which was gonging)* I don't know if this is a good idea having that gonging clock going.

Yes I was just thinking that.

Yes but not to have it would be to stop it and then you have to go through all the chimes when you start up again don't you?

Yes.

So it's all right. I can work around it.

It's strange though when we are in the astral we don't hear the chimes of the clock, not unless we come closer to the group you know.

I don't know if you truly understand the connection between the Earth Plane and the astral sphere, the Summerland. I know I've gone off on a tangent at the moment but I think this is a better discussion. You see that's what happens when you don't have a program. You get waylaid don't you?

We accept when we're upon the Earth Plane that we have a connection with the people in the astral sphere, but our perception is that they're all around us. They see our every move. They see every action that we partake in. That is the way so many people would perceive it would they not? Because they feel that the Earth Plane, while we are upon the Earth Plane, is the centre of our Universe and therefore everything else rotates

around it. And really nothing could be further from the truth because the Earth Plane is such a small part of the Summerland.

And I'm excluding the earthbound souls and the misguided people because they stay within the vibration of the Earth Plane if you understand. So they are one and part of it at all times and they have the opposite problem in that they can't connect with the astral sphere readily. We can try and connect with them but they put a block on it and therefore they lock themselves within the vibration of the Earth Plane, so we are excluding those from my discussion.

And when you look the astral sphere – I am unaware of how many billion people are actually upon the Earth Plane – but there are 1,000 times that and I'm being conservative with that figure, of people in the astral sphere. And they all have lives. They all have lives which they conduct. I was going to say on a daily basis but as we don't have days that's really an incorrect comparison isn't it? But they all have lives which they pursue and it is only if you have, or you choose to have, a connection with the people of the Earth Plane that you receive the vibrational input should we say, from those whom you love and those whom you work with.

And then it is only when we return and we enter into the vibration of the Earth Plane that the Earth Plane resonates within our being at all. Because at other times we are far more preoccupied with the work and the life that we have in the astral sphere. So there is only a very select few people, comparatively speaking, who have a connection with the Earth Plane. And it's even less who have a permanent connection and the people who have a permanent connection are your guides because obviously they have to have a permanent connection because they have to have the ability to be with you at any time to perceive what problems you are going through, understand what's going through your subconscious and try and influence it to the betterment of your time on the Earth Plane.

Then you get the people who desire to be part of the Earth Plane and that generally is your friends, your relations, those who have loved you in the past and have preceded you on your trip back to the astral sphere. So they elect to have a connection but they too aren't there all the time. I mean what would be the point in hanging around when you're fast asleep. We have a lot better things to do with our lives than to watch you in your slumber state I can assure you. But that is the perception that so many people have is it not? That the people of the astral sphere are around them as you say 24/7. But why would we want to be with you on the Earth Plane where when you're in your slumber state you come to the astral? You come here every night.

We have a problem with some people because we can't get to the point where they are truly benefiting from their stay in the astral sphere because they keep jolly well bringing themselves back to the Earth Plane.

So don't ever consider that those whom you love, those who you have a spiritual or loving connection with, will not be with you if you both desire it so. Because your time on the Earth Plane in relative terms is such an insignificant period that if we have to wait around for 30, 40, 80 years it doesn't really impact on our progress because while you're asleep and at other times we can continue with our lives and our work.

A lot of people consider that because we say you don't have to work in the Summerland in the same manner that you do on the Earth Plane because there is no need for financial reward, that we all sit around twiddling our thumbs. Nothing could be further from the truth because within the Halls of Learning there is so much which can open up before us. So much that when we start touching it for the first time, when I say the first time I mean the first time you return to the Summerland, not that you haven't been before but that memory is kept away from you for a short period and that short period depends upon your acceptance and your level of purity, the level of vibration that you have.

Both Maurice and I are fortunate or unfortunate to have had all our life from the time that we wandered from the Heavenly Host brought back to our conscious state. And yet when we come to the Earth Plane our last visit is the only one which is perceived as being important.

Well I've been back to the Earth Plane in excess of 10 times so why should my last visitation be any more important than my other visitations? And the answer to that question is quite obvious, it is the fact that if I'm going to do the teachings as we are doing it's necessary to make that an important part of why I come isn't it because that's where people associate and assimilate with us.

If I started sprouting on about my previous lives it might be of academic interest but that's all it would be wouldn't it? It wouldn't really improve your knowledge or improve the way you think about me, but if I can come in my last visitation or as I was in my last visitation, you can feel a connection. So that's why we come in that form because we want to have that connection and that feel of love and unity amongst us. We want to make everybody feel comfortable.

And I'm working very hard at changing my modus operandi so when we do our demonstrations and become more, as you would say, human, which I think is a very strange thing to say.

Well I think you're succeeding.

Yes but when we come here you see I can be myself because I don't have to play the goose so to speak.

No you don't.

But playing the goose does help to break down barriers when we go and do our demonstrations doesn't it?

Yes it does.

And people think well they're not all a stuffy lot. They are actually quite human. Which really is a stupid statement isn't it? I mean we don't suddenly grow horns when we leave the Earth Plane nor do we grow wings, or a halo! None of that ever actually occurs.
