Introduction to the Fourth and Fifth Planes

By Estelle Roberts 2019

Can you explain a bit more about the Fifth Plane, and maybe a bit more about how it is different the Fourth Plane or the Summerland.

The Fourth is totally different as you know because the Fourth is merely the cloakroom and school to prepare you for moving onto the Fifth Plane. A lot of people say that it is both a cloakroom and jail because once you're in you can't get out.

Well in the Summerland, in the astral sphere, life continues in a lot of ways exactly the same as the Earth Plane. You have your hills, you have your valleys, you have your rivers, you have your flowers, you have your cities, so in so many ways it's a replica of the Earth Plane, or to be more correct, the Earth Plane is in a minuscule way a replica of the Summerland.

When you move to the Fifth Plane there is no need for that form of deception and the deception I am referring to is the fact that in the Summerland we are thought and we can perceive and construct things in our thoughts and things in front of us are almost solid in a physical way. Do you understand? So you perceive things as being solid in exactly the same way as you do on the Earth Plane. You want to hold a door you can physically get hold of it. You want to shake somebody's hand you can physically shake their hand.

When you move into the Fifth Plane you lose all perception of your physicality. Do you understand now? You become a being, for want of a better word, a being of light. A being of light and vibration but each and every one is still an individual. Each and every one has form and differentiates from the other. So you can perceive and understand people in exactly the same way even though you don't see them as a physical being, you still see them as a being and you can still converse exactly the same way through telepathic means.

You recognise their vibration then.

You are part of the vibration. You are vibration and that is why from that vibration you have the capacity to wander out into the Universal, although normally the only part of the Universal that you wander out into is within your Galaxy.

Because your Galaxy is all part of the vibration of the Fifth and Sixth Planes. Now there is something new for you. So the vibration of the Fifth and Sixth Plane is incorporated within the essence, within the vibration of your Galaxy. You can say that

is almost your home.

Is it like an orb?

Well it's like a big egg and we're all sitting in it. But at a different level of vibration and we perceive things totally differently. We see things totally differently. What you see as a star we see as a vibration. There are so many things within the confines of the vibration of the Galaxy which are outside your perception because you do not have the eyes, or the level of understanding, the capacity to see them. The same thing as you can't see oxygen. You can't see hydrogen. But you connect the two together with a chemical reaction and you can see water. You see it's the same, the same comparison should we say. The Summerland is the water, the Fifth Plane is the oxygen and the hydrogen.

And then the higher you go, when you go to the Sixth Plane, your vibration itself doesn't change it merely becomes more dense. Do you understand? Which I always thought was a bit strange. I always thought it would extend out and it's not. The essence which is the core becomes dense, the aura becomes larger. So the core is what is you. The aura is the love which emanates from you.

You see I can tell you these things because I have been and therefore it, as you would say on the Earth Plane, it really did blow my mind.

Because life when you get beyond the Fourth Plane is so much more wonderful because it is so much filled with love and you can do so much more, not only with the beings on the Earth Plane but the beings on other planets, the beings in other vibrations. You can extend your love and go and help them.

We are getting a lot of new information tonight, aren't we?

It's very very exciting.
