## **We look at problems we have incorrectly**

*By Maurice Barbanell 2013*

*Our lives just seem to be all about suffering so it would be nice once in a while to have a little miracle you know...*

I will not accept that ..... You have had times in your life when you have had great comfort in the material sense and the problem at the moment is that comfort is not at the same level and therefore that is where the discomfort mentally comes. We have all had to go through those problems have we not Judith?

Yes.

There were times when young Roy was so distressed about the financial situation he found himself in that he anticipated shortening his stay upon the Earth Plane. You see the polite way I put it. But the realisation that he would have to come back and suffer it all over again and that what he was programming in his mind would leave his loved ones with a greater problem, and a big jolt from Henry (*Roy's guide*) brought him back to his senses.

*Thank you Henry.*

We all need to do a bit of that don't we, be brought back to our senses because there isn't one amongst us who hasn't and won't be put in those situations at one time in your life. It's the nature of the Earth Plane.

I asked for questions and I just carried rambling on. It's a little bit of my nature really isn't it? I actually didn't come at all with anything prepared. Young Henry had his off pat so to speak. He knew exactly what he was coming to talk about. I just came and thought well I'll just have a chat. But there is one advantage that I have, having been involved in our Spiritualist movement for a number of years both on the Earth Plane and here, I have just a modicum of knowledge and perception of what is required shall we say.

*Yes you do have the advantage.*

Just subtle. And we all once we come here, wish that we had had the foresight while we were on the Earth Plane. You've heard the saying many times, you can't put an old

head on young shoulders. It would be good if you could would it not but we all have to learn by experience.

*Well it's the only way.*

It is and whether we improve or go backwards is entirely up to us. We can't blame anybody else. My biggest regret was to distress my lovely wife, hurt her when things were going wrong, but we all do that don't we?

*Well she was the closest to you...*

Exactly and she took it well. She never retaliated and that was a great lesson to me you know. It is a great lesson to all of us really, to take it and not retaliate. That's really living in divine love. We all find it a bit difficult to do that don't we? We have the people that we love and we treat them, at times, the worst.

*We think we can do that.*

We think it's our divine right almost don't we? Sometimes it is better that we were hermits is it not? Then we don't have anybody to blame. People think that they can lock themselves up in monasteries and nunneries and then all the problems of the Earth Plane will be dissipated. I can assure you Judith, on your last visit to the Earth Plane, that your problems were not alleviated just because you were in the nunnery. You had just as much drama to overcome than if you were in the outside world.

*Was that part of the personality?*

It is part of what she had to learn, yes. I have Estelle standing over my shoulder and she is laughing and saying "at least you didn't have to deal with the other species (men)". I don't know what she's talking about.

*The other species can be a little difficult at times.*

And the same vice versa believe me. Having been both species I can speak with a certain degree of authority and I will openly admit I only came back to the Earth Plane as a feminine gender once.

*And it's enough.*

Well it was enough and I decided that I'm not going to go down that avenue again.

*Too many complications.*

Most definitely and when I was on the Earth Plane the female species were subjective. You were subjected to the will of so many. You were nothing less than slaves but if you have the right mental attitude you can cope with it and live a relatively happy life. It's all down to state of mind.

*When you know that within your psyche that you can do better you rebel. That's how they get themselves killed you see or taken away from the Earth Plane because they rebel against their masters. I'm sure I've done that.*

Exactly. The Earth Plane has matured and improved greatly but there are pockets where it is going in the opposite direction.

*Well thank you for saying that because I sometimes think...well I don't know...it's not all going upward.*

No but when you look at, and I'm just looking using fictitious percentages now, if you could say that 90% of the Earth Plane was in a negative state that accepted slavery as normality, accepted subservience as normality, now that percentage is say 20% or 40%. It doesn't mean that that 20% or 40% is good but it's an improvement on the 90% and therefore we look at the whole, the big picture and eventually that 40% will reduce to 20%, will reduced to 10% and then will be eliminated totally. But do not hold your breath as they say because it will not happen in your lifetime or many, many dozens of lifetimes in the future.

*Well it's a forgone conclusion. You can just see how it's all going.*

The people of the Earth Plane do want everything done yesterday don't they? It is the society that you are involved with at the moment.

*Because of technology you see. Technology is growing rapidly.*

The technology of the Earth Plane is only a minuscule compared to what is reality in the astral sphere.

*Absolutely but technology is moving ahead of mankind.*

No technology is only moving as fast as the Divine Plan allows it to. Man in itself has not changed anything or discovered anything that hasn't been given to them by Spirit. So therefore if it has been given to them by Spirit obviously it is part of the Divine Plan.

*Do you think that we actually are ready for all of it?*

It will all become normality. There is a problem with giving things to the peoples of the Earth Plane and the example that I will give you is the thought, the desire, to improve the light condition of the Earth Plane and therefore electricity was shown as a means of power. And what was the first thing that the people of the Earth Plane did? They built an electric chair. A means of destruction. And this occurs so often when we try and bring about benefits, the human nature, the willpower of the peoples of the Earth Plane utilise that in a destructive manner. You just ask the American Indians about it. They did not have technology on their side and when the white man came in with their Gatling gun it was an extreme advancement in technology which was beyond their capability to retaliate from.

*You can't even see your enemy...*

And that is a problem that they had to overcome but the Earth Plane has survived. It wasn't destroyed as a result of it and the tribes gradually were enfolded within the mass population. They were blended and that's what has to happen in general terms upon the Earth Plane. You have to have a blending of cultures and people.

*Yes I have a problem with that, especially when they can't speak the language.*

Believe me that's your problem.

*Of course it is.*

*Maurice Barbanell  
June 2013*
