Researching the Subject before The Talk

By 2013 Maurice Barbanell

We do like to have our little games sometimes you know. Roy nearly always asks, and Henry is very kind he normally does tell him who is coming through, but sometimes we like to have our own little game and that's something that a lot of people on the Earth Plane have difficulty in perceiving. The fact that we are human and therefore we do like to have our little bit of humour, even though some people might consider it a bit twisted. Well they do because they don't feel that we should have any humour and therefore the very fact that we do, they find it very difficult to comprehend. At the moment we've got to have a sense of humour. I mean damn it, we are in the bloody colonies! So therefore how could we really take things that seriously?

Is there any subject which, I'm not saying that we are going to answer it tonight, but we are looking for subjects which are of interest and are concerning you? Well not necessarily concerning you but which you have pondered upon and wanted an answer or required a greater explanation. I'm not saying that we will do it tonight but ponder on it and if it we can we will expand your knowledge on what has been concerning you. I know it's very difficult when you get thrown a question like that and your mind goes into an immediate blank does it not?

Absolutely.

So therefore we have perceived that this would be the situation, so over the next couple of weeks think about it from time to time and your individual guides will then be in communication with Henry and through Henry to the lecturers at the Halls of Learning to direct the questions to the correct people to convey the answer.

That is something else that a lot of people haven't actually contemplated is the fact that we are not the font of knowledge and a question which is asked could be more suitably answered by various other individuals because they have a better handle on it and a better way of understanding it. Because you wouldn't go to a biology teacher if you wanted to learn about geography would you because they both might have the knowledge but one has the ability to explain it in far greater depth and understanding then he or she who has an overall knowledge and we want to have a depth of understanding.

Estelle is actually exceptionally good at that is she not? She takes a lesson and you don't even know you're getting a lesson and then at the end she asks frequently if there's anything that she needs to expand upon and very rarely is there any requirement because she has researched the subject matter and therefore has put together a package which hopefully will resonate into all of the recipients' subconscious.

And that's something else which you probably hadn't thought of that when we research a subject we then also have to research the level of understanding of the people that we are conveying the message to because the depth of understanding and teachings which we can give to a group like this is far different to that which we could if we have a lot of newcomers. It would go right over their heads would it not and therefore the level of understanding would not be there.

A little concerned about our friend you know. He has fallen by the wayside a bit and he was looking for spirit, as you so quaintly call us, to resolve all the problems and it's a strange thing, we are permitted to do so little which is outside your programmed plan.

That is another concept which is greatly misunderstood. People come to our teachings, and I'm not only referring to our group, I'm talking generally, and the perception is that all problems which occur on the Earth Plane can then instantaneously be removed. After all you are talking to spirit and therefore spirit has the ability to remove all issues.

That is the perception. It's unfortunately a totally incorrect perception but that is the perception is it not? We are very fortunate with the group we have that none of you actually have that perception. In fact to a certain degree you go a little bit the other way. You don't ask for help when you should. Which is a bit silly really isn't it because you have a multitude of wonderful people whose only desire is to help if they can but their hands are tied, metaphorically speaking because you don't jolly well ask for help. That's something which is very difficult to get through to people, that our hands are tied unless you ask. If you ask 20 times in a day it is irrelevant. We might only take it up twice, but if you haven't asked at all that twice would not occur.
