New Age Thinking and Different Vibrations

By Maurice Barbanell 2013

It is a strange thing you know, we all think that we have the worries of the world on our shoulders. We all think that we have far more problems than our fellow man and then something occurs such as is happening in the Philippines, Vietnam and the surrounding islands (*they were experiencing extreme weather conditions and earthquakes*) and we realise how fortunate we really are. We live in a very protected and lucky place. When you compare the lifestyle and the problems in other countries you cannot fail to appreciate how fortunate you are in this country of yours. (*We are currently living in Australia.*)

Our friend Winston Churchill feels that he should return and redirect the world economy because the leadership can either send you in one direction or the other. I've heard it said many times that you are in the lucky country and in your trips around the world you have realised how true that statement is.

Yes indeed.

You realise how fortunate your lifestyle is in the country that you have adopted. It is a shame that we cannot say the same for the homeland. It has its problems at the moment. I was trying to be polite because if you go into the countryside life is very different to that in the suburbs, in Brixton, and in so many of the problem areas. There is a lot of hostility, a lot of aggravation and I despair when I see the youth of today. Discipline and the ability to listen is greatly lacking to the multitude.

We will – I will rephrase that – there will be a great change. There has to be a change in thinking but society changes on a regular basis. You get a stage of great happiness then you get a stage of – I was going to say debauchery – but a stage of rebellion and we are going through that in a lesser degree to what has occurred in the past.

If you do not mind, rather than standing I will sit amongst you and talk. It seems so much more friendly does it not if you...I always felt that when you are standing and everybody's sitting around, you should be behind a lectern because you feel that you are giving a lecture and what we have been trying to do with our group here is to breakdown that barrier and treat our meetings as a meeting of friends.

We are very fortunate that our group of friends extends to some of the most enlightened and loving people that ever walked the Earth Plane. I very nearly said that ever existed, then I realised the folly of my statement because those who have not deviated and therefore have stayed upon the 7th plane and beyond, are obviously far more elevated than any of the people who have been allowed to return to the Earth Plane to teach. And I'll let you think about what I just said there.

Pause.....

We hold the people who come, people like Silver Birch, people like Beloved Alpha, people like so many others who in our perception are the ultimate essence of purity and yet each and every one of them have been a member of the Earth Plane. Each and every one of them had deviated from the path of true purity to a greater or lesser degree because if they hadn't, they wouldn't have the ability to teach in the way that they do. Because if you have never had experience of the problems of the Earth Plane how can you expect to fully comprehend the attitude and the problems of the people who are currently upon the Earth Plane. And therefore the people who reside in the 7th plane and beyond, who have never allowed their being to be devalued in the way that we have are obviously far different in nature. Something that I do not think that many of you have considered.

There is a great movement going on, on the Earth Plane at the moment and they are stating that beings from other planets, other galaxies, are getting ready to communicate with the peoples of the Earth Plane. This they call New Age teaching. Now I want you to think about that teaching for a second and put it in true perspective of the teachings which you and we have been given.

The very basis of that teaching assumes that the beings from other spheres are in physical form such as you are yourself. Obviously they have to be in physical form to be able to communicate and partake in a one to one discussion with the peoples of the Earth Plane. This obviously does not occur. I am not saying that there are not beings on other planets, other galaxies, other spheres, who are not humanoid in form but we who have greater knowledge understand that your physical body is merely a shell. The true being which is contained within is in essence on a totally different vibration to that of the physical being. The communication between the other spheres will occur but it will occur in the astral sphere not the physical. Because the vibration which they have is more in tune with the astral sphere than the physical and if you consider that statement for a second, if their being is attuned to the astral sphere, obviously they are not visible with human eyes. Because your human eyes, your human physique, your position upon the Earth Plane, limits your perception of other beings to that of matter and therefore if it doesn't form in matter you cannot fully perceive it. And there have been many visitations upon the Earth Plane from other spheres but you would not be aware of them because you cannot perceive their being.

So do not allow yourself to be swayed by the New Age thinking. Keep your thoughts on the straight and narrow. Keep your thoughts within the confines of the teachings which you have been given because the teachings you have been given are as close to the truth as can be understood.

I understand that my friend Estelle tried very hard to explain the differences between the Earth Plane, the Summerland and the planes beyond, the difference in vibration, but no matter how hard she tried to find an explanation, there was no way of perceiving because you cannot perceive something which you cannot and have not experienced at this point in time because at this point in time your total perception is that of a material, physical being and a material, physical world.

You accept the fact that the Summerland as we have labelled it, exists. You accept the fact that your astral being is of similar nature to your physical being but how and where the two exist is very difficult to perceive. Because we have told you that in the Summerland there are many rivers, there are many mountains, there are many forests, there are many towns and cities, there are many Halls of Learning but your perception upon the Earth Plane means that they have to exist in material form. And this is not a criticism because you have no other means of comparison. And it's strange really when you consider that you have spent more of your lifespan in the astral sphere than you have in the physical and yet you find the astral sphere something which eludes your comprehension. So I will not try and explain because obviously as I have said it is outside our realms of perception while we are upon the Earth Plane but accept as fact, as gospel, that it does exist and it exists in reality.

We must have the information somewhere else. Obviously it is inaccessible to us while we are here.

As the Nazarene said, all you have to do to conquer death is to die and all you have to do to then perceive the Summerland is to remove yourself from the physical body and then your perception is there. And the reason why Estelle is in the Halls of Learning is because as the peoples of the Earth Plane find it very difficult to perceive what is before them, the peoples of the Summerland have an equal amount of difficulty in conceiving what goes beyond, because the difference in vibration occurs far more dramatically from the Summerland to the 5th plane than it does from the Earth Plane to the Summerland.

The transition between the Earth Plane and the Summerland is relatively seamless because to all perception it is similar. I was going to say identical but to the untrained eye it is identical. You still see people. You still see houses. You do not see cars, you do not see other means of transport because there is no need for them. That is something which is very difficult initially for people to understand when they do not have the knowledge which has been given to all of us. Because if you do not understand the movement by thought and your only perception of movement is by mechanical means then to have any other means of transportation is beyond your understanding, but we all know that movement by thought can occur. After all your guides can be literally millions of light years away and yet when you require them they

are by your side within a split second. This is the movement in the astral sphere. I can leave this group this evening and be in a group on the other side of the world the next second, such is my and our ability to transverse the Earth Plane. It would be a wonderful way of travelling would it not?

It certainly would.

Yes, if you didn't have the encumbrance of this physical body. It would be a lot more pleasant a life would it not?

Yes it would.
