Everything is a Vibration

By Maurice Barbanell 2013

It must be difficult to explain the differences between the vibrations of Earth Plane and the vibrations of the Summerland and beyond. In our subconscious we must have that information but we simply can't access it.

You have the information. You just do not have the ability to perceive it because there are parameters outside which, whilst you are contained within the physical, it is impossible to reveal.

Thank you for that.

It is a matter which is a difficult comprehension that matter is a form of vibration and that perception is difficult for people upon the Earth Plane to comprehend because they look at matter and they see it as solid and yet all matter is a form of vibration. It is merely formulated in such a way so it looks solid to your perception.

It's really an illusion.

It is an illusion and all you have to do is change your level of perception to see the vibration in a different form because all matter has a vibration and nothing exists upon the Earth Plane which does not have a form of vibration within itself and the vibration obviously is broken down into its smallest structure of your atomic breakup, your neutron and your protons and electrons and therefore it is only the combination of such which creates the illusion of mass.

It is quite incredible isn't it?

It is just your perception. It is all a vibration but you wouldn't perceive it in that way because your perception is solid. It is the same thing upon the Summerland. The perception is that it is solid but in fact it is an illusion. It is an illusion because it has been created and if something can be created in the Summerland by thought, by very virtue of that fact it has to be an illusion does it not? Very difficult concept to get your head around isn't it?

It is a little bit.

So we won't try. We will just accept it shall we. It's far better to just accept things when we cannot fully understand it isn't it?

That's right.

Yes and what you have to say is “well that's what I've been told and I accept it as fact”. You will fully understand the vibration of the 5th plane when you are ready to take that step.

Sometimes certain things have to be left.

Until the time is right.

If you tried to analyse the fact that the Universal is part of our reality that is truly mind blowing. When you consider that the Earth Plane even within your Galaxy, within your universe, is a small speck of sand and you then perceive that the Universal is part of our reality, then the perception of reality is mind blowing.

That is far too much for me to think about at the moment.

It is far too much for me dear as well, so therefore do not feel embarrassed.
