The Teachings moving Forward

By Maurice Barbanell 2015

It is quite strange you know we have classified our group, our teaching group, as the Maurice Barbanell home circle. There's been one point of absence with that statement though has there not? I have not had the ability to be with you as often as I would like. That is a problem of being a gentleman you know. You take a backwards seat and allow others to take the stage so to speak. But do not ever think that I am too far away. I am always with you at all times, with you and young Roy even more so than with the rest of the group for obvious reasons.

We have decided, I say we and I should have said that it was decided and I was a party to the decision although not the decision maker, that it would be more beneficial as an acceptance that my friend Estelle be the forerunner at our meetings which are to come because she has a particular style, a particular way of conveying things, which is so different to our medium and myself.

Why would you consider that this is important? It is important because there will be constantly people in the audience whose sole desire is to denigrate and disprove and because I have been privileged with having an English accent and because I utilise the voice box of the physical body I am contained within at this point in time, the similarities could very easily be missed construed and twisted, whereas Estelle is so different in her tone and method of projection that it is not as easy to convey a problem should we say.

I'm sure you would understand, as it was explained to me, I had to take a step back once more. You learn a lot of patience, forgiveness and acceptance over here you know but the big difference is because some of us have progressed a little bit further to the line of purity should we say, that the negative thought of being displaced doesn't even enter the mind. We just accept the fact that the situation has changed and other parties are more suitable for the work we have to do and therefore we take a backstage position rather than a forward position. This is something that a lot of the psychics, so-called psychics and mediums that we utilise upon the Earth Plane could learn a great deal from. So often, and I obviously have been to many groups to assess the situation, so often it is about the medium, the great "I am", rather than the messages which are being delivered.

It is a strange concept is it not that we give out our teachings of love and tolerance and yet the people who you would think would absorb these philosophies would be the very vehicles which we utilise to deliver them would you not? Unfortunately this is not the case. Unfortunately that three letter word gets in the way so often. Obviously we are referring to ego, the great "I am". So often you have the situation where the medium would berate another because in their perception they do not have the faculties, the ability to transmit messages, the ability to see spirit, the ability to sense emotions, not in their esteemed opinion as high as they have themselves. This of course is a great negative to their progress.

So you might wonder why we persist in utilising such mediums, such vehicles and the answer to that is very simple. It is that we utilise all and any channel that we can to get the message out. Once the message has been delivered, your guides, their guides, can instil upon your thinking that you require a change of direction so you then go looking until you find another group who is more in tune with your progress. Once you have finished with that group you might move forward once more.

With all due modesty we are very fortunate, and I include myself into that area, to have the highest level of connection and teachers that are available on the Earth Plane. I know that is a very large statement is it not, but it is a statement of complete and absolute truth. So the teachings which you will receive, the teachings that you have received, will be and have been the pinnacle of all and any teachings which are delivered to the Earth Plane.

I am aware that you are not able to totally perceive that when we have our teaching group, how many individuals attend and are desirous of being there a lot longer than actually occurs. You might find that a very strange concept would you not because our teachings, to a certain degree, happen at one period per year. That time is the time of the Upliftment. But you might well say what about the Halls of Learning? Yes my friends, what about the Halls of Learning. In the Halls of Learning you can get the response and answers to any question which might enter your consciousness or subconscious. But in that statement is the problem because as you have said Judith on a few occasions, if you do not know what to ask how do you know what you don't know, or if you don't know something how do you know that you have to ask about it. Is that not correct?

Yes.

And this is why groups like our own are so beneficial to the masses in the Summerland because they get the gems of wisdom which they didn't know they didn't have. Because if you do not fully comprehend the truth of what you are doing, why you are progressing, why you are suffering, how can you then look for solutions and answers to the problems which beset you, because you are not aware that you have a problem do you? If you are brought up in the gutter and that is all that you have ever known, your perception of life is limited to the perception of life in the gutter and it is not until

somebody enlightens you, opens your eyes, that you are then desirous of removing yourself from the gutter and moving forward.

So do not ever belittle the importance of our teaching group. It is as we have said on many occasions not only for your benefit, it is attuned to your benefit but the number of individuals who are touched by these teachings, who learned from the teachings, is immense.
