## Love and forgiveness is a common thread with all the Masters

*By Maurice Barbanell 2015*

As we move forward the gift of healing will be one of the main stays, the main reason for the main acknowledgement of a greater power. The Nazarene utilised this method to gather the crowds and once they had gathered, the Christ had the ability to deliver the teachings at the level which the crowd could understand and accept. Humanity has progressed a great deal since those times but the base teachings which came through the Nazarene are as true today as they were 2,000 years ago. The base teachings do not alter. The parables which were told were obviously slanted so that the people who were nomadic by nature could relate to. Obviously if the main populous was of a different culture the teachings would have to be slanted in a slightly different direction.

The essence of love and forgiveness is a common thread with all the Masters who have visited the Earth Plane. Do not get under the impression that the Masters such as the Nazarene, such as Confucius, such as Prince Siddhartha, such as Mohammed, are the only Masters who have visited the Earth Plane. There have been many Masters but it was not considered correct that they be brought into the limelight of the masses and therefore the area in which they dealt was more secluded should we say, a smaller sect. I don't like that word "sect" but it probably describes it best does it not. A smaller group of friends, I prefer that, and they can touch these individuals in such a way that others could not perceive or have the ability to do and from a small beginning if you treat and influence two or three people in your life that will expand like an inverted pyramid. You could say it's pyramid selling for a good cause couldn't you? But the principle is the same.

Obviously we hope that we will touch far more than one or two and obviously the more we touch the more the teachings and the acceptance of our true life will continue to expand. Because unless you have an understanding of your true life and what is to come, which as you know because you are more enlightened than most, it is merely the next stage but to get an acceptance of the next stage is a large step forward is it not? To get an acceptance of a continuation of life, to get an acceptance of a higher being who is the epitome of love, to get an acceptance that we are responsible for our

own progress, to purify our being, to purify ourselves, once we can get that acceptance then the necessity, to a great extent, of the Earth Plane will desist, be eliminated.

Obviously this will not occur for many generations because an awful lot of people have a lot further to go with all due respect than we who are in this room at this point in time. And I do not mean that as a point of making us all feel good about ourselves. It is merely a statement of fact and you would be a fool if you considered that you hadn't progressed to a greater level than many others on the Earth Plane and I am sure I am not speaking to fools. It is not something that we ever considered is it? We do not consider that our progress is greater than another and the very fact that we do not consider it is testament to our progress because we do not wish to put ourselves forward. We do not wish to consider that we have advanced more than another. All we wish to do is spread the teachings and give out love. If we can achieve that we have achieved far more than was ever perceived that we could do prior to our small visitation.

Always remember that I and your spirit team, as it has been so quaintly put, are always with you and our sole desire is for you to progress far in excess of the expectation when you entered the Earth Plane. Because if you take the opportunity you can achieve what would require two or three visitations and wouldn't that be wonderful that we can eliminate the need to revisit the Earth Plane? That is my true desire to have each one of our chosen friends purify themselves to the point where there is no necessity to return to the Earth Plane for future progress.

At that point I will take my leave and thank you my friends. Until we meet again I bid you farewell.
