Maurice teaches World Wide

By Maurice Barbanell 2018

We all have our own idiosyncrasies do we not? We all have our own ways of looking at things. Isn't that what we were talking about?

I was interested in the work that you do. Apparently you're a guide to someone in Persia.

No I didn't say that. I said I give talks in Iran which used to be Persia, not that I was a guide. There's a subtle difference.

OK.

I am a guide to no one apart from an assistant guide to Roy which was a faux pas on my part but having made the commitment I have to live by it. You see we all make mistakes in our lives. So a guide to no one am I, but I give guidance. There's a difference you see. I give teachings to 6 groups.

Could you tell me who you give guidance to in Persia. The reason for that is I'm intrigued about Persia, sorry Iran.

Why? What would the difference be?

Well being a country which is mainly Muslim.

There is a lot of Christians in Iran as well. And who says that I do my ministry should we say, upholding the Christian values? It is merely a perception you have is it not?

It's just a curiosity that I would be very pleased to hear about.

Well I can assure you that the true Muslim people, the people who are genuinely following the teachings of Mohammed, are more Christian than a lot of Christians. Because the teachings of Mohammed follow the teachings of the Nazarene.

Did the Mohammed not say that I am a messenger of God no more or no less than the Nazarene? Maybe you didn't know that but he did.

It is clear that they preached the same. It was just taken out of context.

And in answer to your question, when I visit the medium that I do in Iran I teach the gospel according to Mohammed. Because it is reasonable to follow that and it is not that much different, but I teach the truth not the interpretation. Do you understand the difference?

For me it is good news really.

Yes and I can assure you that when I take on the astral which I have to do to return there, I am of a totally different nature to what I am when I come amongst you.

The other 5 groups that you attend are they in Iran?

No around the world. I am not exclusive. I have never claimed to be exclusive and it would make a liar of me to insinuate that was the case. That is the case with Estelle but that is because Estelle had no desire to return to give teachings to the Earth Plane. She had moved on and shall we just say, it wasn't in her programme. But you see even her, even she who would not be changed, changed her thinking and re-joined our group, or joined our group. It would be more correct to say re-joined our group because...no it wouldn't because she never left our group and therefore she just joined our part of the group. That's probably a better way of putting it isn't it because she was always, as I have always been, a part of the greater group. You cannot perceive the extent of the tentacles which spread our group out.

Does this group have a name?

I don't know. I've never really asked. It is just a group which is of common...you could say common DNA. We all have a common purpose. We all have a gathering of love for one another, a connection with one another. There are many groups and the further up the ladder you go to speak, the less the significance of the group occurs. Do you understand? When you're in the Summerland the essence of the group...you could call it a big family...that's probably a better way of putting it. It's a big family rather than a group, and you know when you have an extended family it can have tentacles that spread an awful long way, can't it?

You mightn't even know some of them.

Exactly but if you meet them, you feel a oneness, a connection, do you not?

An affinity.

Yes and that is a better way of putting our group. We all have an affinity and a connection with one another. Therefore our thinking, to a greater or lesser degree, is on the same wavelength.

Obviously there are a lot of people who are on different wavelengths and I'm not saying that our group is better than other groups. Obviously we consider it's better than other groups because we are members of it are we not? But it is a group of similar vibrational understanding, to a greater or lesser degree. Not everybody in the group is of a higher level of understanding, not everybody in the group is of a lower level of understanding. There is a mixture.

That originated from when we all fell from grace?

It originated from back then yes and you cannot perceive the magnitude of the dispersal and disruption.

The people of the Earth Plane look at the quantity or the number of occupants of the Earth Plane and are aghast. You multiply that number by a hundred million and you might get a small perception of reality in the astral sphere.

But there is a difference. Here we have physical bodies and have to rub shoulders with many vibrations.

You all have physical bodies which rub shoulders with beings of similar or different vibration.

Mostly different probably.

All different but that's the beauty of the Earth Plane. Haven't you been told that numerous times?

They can tell me that. I haven't been convinced.

When you mix with people some of them you feel akin to, some of them you feel alienated from and therefore if you feel alienated it's because they feel or don't perceive things in the same way as you do. Their attitude to life, their attitude to the way they treat people, their attitude to so many things. That is their level of attunement and that is what it is. It's a level of attunement should we say. I obviously feel that our group has the more correct pathway to a level of attunement and purity than any other. Obviously we must do because we are all members of the group. So therefore I am talking to a communal group who are at one with our thinking.

The members of our larger group count in the millions and that is a rather a large family isn't it? But they are all part of our group. You could just say it's our little country, except it isn't bounded by a physical plane. It's not bounded by a place. It's bounded by an emotional connection, a vibrational connection if you would.
